EDUCATION

CompTIA Security+ Certification

In Progress

RMK College of Engineering and Technology, Tamil Nadu

Aug 2021 – Jul 2026

Bachelor of Engineering in Computer Science

Sri Chaitanya, Hyderabad, Telangana

Aug 2019 – Jul 2021

Senior Secondary Education

Jubilee Hills Public School

Mathematics, Physics, Chemistry
May 2019

Primary and Secondary Education

EXPERIENCE

Lead Developer Intern

Jan 2025 – Present

projectkaapi.com – Kaapi Ration

Hyderabad, Telangana

- Built and fully customized a **responsive Shopify storefront** for a specialty coffee brand.
- Developed and deployed a **custom POS system** for a small cafe inside IIIT Hyderabad.
- Authored UI components using **Liquid, HTML/CSS, and JavaScript**; configured Shopify apps for subscriptions and faceted product filtering.

Web Developer

Jun 2025 – Jul 2025

NeighbourhoodMinds.in – Communitie

Hyderabad, Telangana

- Contributed to a **mental health awareness platform** built in Framer.
- Resolved responsiveness issues across device breakpoints and improved page load performance.
- Collaborated on UI/UX enhancements; shipped design improvements in tight two-month engagement.

Python Junior Developer

Oct 2023 – Jun 2025

FirstPay eCommerce Private Limited

Hyderabad, Telangana

- Built and maintained **internal Python tooling and backend features** for a fintech/eCommerce product over a ~20-month tenure.
- Debugged recurring application issues with cross-team collaboration; improved system stability through targeted fixes.
- Applied foundational **security practices** and participated actively in code reviews.

Social Media Intern

May 2021 – Jul 2021

Express, Don't Suppress

Remote

- Managed multi-platform content and tracked campaign engagement; coordinated with influencers on promotional campaigns.

PROJECTS

Self-Hosted POS System | *Python, Firebase, NPM* | GitHub

- Developed an open-source, self-hosted POS system designed for small cafes — lightweight alternative to bloated SaaS billing tools.
- Built inventory tracking and billing workflows on top of Firebase for real-time sync across devices.
- Packaged and distributed via NPM for easy self-deployment; structured for extensibility so cafe owners could adapt it without touching core logic.

Court Data Scraper Pipelines | *Python, BeautifulSoup, Requests, OpenPyXL*

- Built automated scraper pipelines for 4 Indian tribunals (CESTAT, NGT, NCLT, NCLAT) to extract daily cause list data from court portals and PDFs.
- Handled CSRF tokens, session management, and multipart PDF downloads; implemented batch POST uploads to a live case data API with async job tracking.
- Designed a unified single-file pipeline architecture with dry-run toggles, dual file/console logging, and Excel/JSON local output across all benches.

YouTube Stats Scraper | *Python, Flask, Google Cloud, HTML, CSS* | GitHub

- Built a Flask web app that pulls channel and video analytics via the YouTube Data API v3, with a clean frontend dashboard for stat visualization.
- Integrated Google Cloud services for API key management, quota handling, and app deployment.
- Structured the backend to handle paginated API responses and aggregate metrics across multiple videos/channels in a single view.

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL, HTML/CSS

Frameworks: Flask

Developer Tools: Git, Docker, Google Cloud Platform, VS Code, Angry IP Scanner

Libraries: Pandas, NumPy, Matplotlib
