EDUCATION

RMK College of Engineering and Technology

Bachelor of Engineering in Computer Science

Aug 2021 – Jul 2026

Tamil Nadu, India

Sri Chaitanya

Senior Secondary Education (Mathematics, Physics, Chemistry)

Aug 2019 – Jul 2021

Hyderabad, Telangana

EXPERIENCE

Project Kaapi – Kaapi Ration

Lead Developer Intern

May 2024 – Present

Hyderabad, Telangana

- Built and deployed **projectkaapi.com**, a fully customized, responsive Shopify storefront for the specialty coffee brand.
- Developed and deployed a custom **POS system** for a small cafe inside IIIT Hyderabad, handling live billing and inventory sync.
- Authored UI components using Liquid, HTML/CSS, and JavaScript; configured Shopify apps for subscriptions and faceted product filtering.

FirstPay eCommerce Private Limited

Python Junior Developer

Oct 2023 – Jun 2025

Hyderabad, Telangana

- Engineered and maintained **internal Python automation tools** and core backend features for a high-volume fintech platform over a ~20-month tenure.
- Debugged recurring **API layer and data synchronization** bottlenecks, collaborating with cross-functional product squads to optimize overall software runtime.
- Hardened internal tools against vulnerabilities by embedding **secure coding practices**, role-based checks, and proactive unit tests during peer code reviews.

NeighbourhoodMinds.in – Communitie

Web Developer (Contract)

Jun 2025 – Jul 2025

Hyderabad, Telangana

- Optimized **multi-device UI breakpoints** and structural layouts for a major mental health platform using Framer, reducing mobile rendering delays.
- Diagnosed and refactored visual assets, asset delivery pipelines, and scripts to markedly improve page speed performance indexes.
- Translated wireframes and interface guidelines into live, production-grade web infrastructure within an agile, high-velocity two-month development cycle.

TECHNICAL PROJECTS & SECURITY AUDITS

College Infrastructure Security Audit | Nmap, Network Reconnaissance

Apr 2024

- Discovered and reported an **authentication bypass vulnerability** within an internal college server hosting confidential files.
- Mapped the local network topology via automated IP scans to locate and verify the exposed target host.
- Authored a formal mitigation disclosure report outlining remediations including network segmentation, firewall filtering policies, and local IDS deployment.

Court Data Scraper Pipelines | Python, BeautifulSoup, Requests, OpenPyXL

Nov 2024

- Architected end-to-end automated **ETL scraper pipelines** for 4 major Indian tribunals (CESTAT, NGT, NCLT, NCLAT) to ingest daily legal listings.
- Handled multi-part PDF text parsing, complex session state tokens, and dynamic CSRF handshakes.
- Engineered a single-file pipeline architecture executing asynchronous batch POST payloads to a live case data API with dual-mode runtime toggles.

YouTube Statistics Scraper | Python, Flask, Google Cloud Platform, HTML, CSS | GitHub

Aug 2024

- Built a full-stack Flask data aggregation application consuming the **YouTube Data API v3** to map complex video metrics into an intuitive analytics dashboard.
- Managed Google Cloud pipelines, structuring secure mechanisms for API key management, quota handling, and server execution.
- Optimized backend data handling to dynamically parse paginated stream responses, calculating rolling analytics for multiple entities in one view.

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL, HTML/CSS, Liquid

Frameworks & Libraries: Flask, Pandas, NumPy, Matplotlib, BeautifulSoup

Databases & Cloud: Firebase, Google Cloud Platform (GCP)

Tools & Platforms: Git, Docker, VS Code, Linux, Shopify CLI, Nmap

AI Code Acceleration: GitHub Copilot, Cursor, LLM-assisted code refactoring & debugging

Certifications: CompTIA Security+ (In Progress)
